Microsoft Hackathon 2017

Are you ready for the future?

Microsoft would like to invite you to participate in a 12-hour hackathon where you and your team will explore how to deal with challenges resulting from technological innovation.

Technology brings rise to many opportunities for the future, but is the world ready for these changes? How do we deal with cyberbullying among young children and teens? How do we program self-driving cars to make ethical decisions? How do we ensure artificial intelligence does not overrule human intelligence and emotions?

What's in it for me?
Aside from meeting fellow talents in your field, you will be able to connect with Microsoft experts, get a hands-on experience with some of the latest technologies, and more!

See you there!

When?
July 7, 2017
10am – 10pm

Where?
Microsoft Nederland
Schiphol

Who?
HBO/WO students eager
to solve world problems

Registration:
aka.ms/hack2017

Registration closes June 26
